

- It is difficult to open the wagons when loaded as the dimensions of the unloading hopper are much larger than on smaller wagons and the entire weight of cargo lies on these hoppers. Therefore, the pressure on the opening is really considerable.

**It is necessary to open the hopper slowly, only partially, let part of the goods discharge and slowly, gradually (as the goods inside diminish) open the wagon until it is fully opened.**

- We are asking you to open the wagons only manually, without using tools / levers, otherwise the gear mechanisms will be damaged.
- We highly recommend you to always open the unloading mechanism by two workers at the same time (each from other side of the wagon).
